

COMIDA Leu B FORMULA

1 – 14 years

Food for Special Medical Purposes

For toddlers and children with Hyperleucinemia

- ü free from leucine
- ü supplemented with vitamins, minerals and trace elements
- ü provides energy from fat and carbohydrates
- ü in accordance with current recommendations
- ü is convenient and can be prepared easily (measuring scoop included)

DESCRIPTION:

comida-Leu B formula is an amino acid mixture free from leucine. Its amino acid profile is based to that of comida-Leu B ensuring supply of high quality protein. comida-Leu B formula is supplemented with vitamins, minerals and trace elements according to current international recommendations.

The main source of carbohydrates is maltodextrin, the fat blend from vegetable oils contains the essential fatty acids linoleic acid and α -linolenic acid in accordance with international recommendations.

INDICATIONS:

comida-Leu B formula is to be used in the dietary treatment of toddlers and children over 1 year of age with Hyperleucinemia.

RECOMMENDED USE:

The daily amount of comida-Leu B formula needed to supplement the daily protein requirements (other than leucine), depends on age, body weight and individual tolerance for this amino acid. The dose of comida-Leu B formula is to be determined by a physician and must be adjusted regularly.

comida-Leu B formula should be fed in 3 – 5 doses during the day, preferably together with a natural protein source.

comida-Leu B formula can also be used in combination with calculated amounts of comida-Leu B, especially in grown children with increasing protein requirements.

PREPARATION:

comida-Leu B formula can be prepared with warm or cold water in a glass, cup or shaker. Add measured amount of powder (2 scoops equal 15 g comida-Leu B formula in 90 ml water) and stir well – comida-Leu B formula is ready to drink!

Please monitor dental care, especially before bedtime!

IMPORTANT NOTICE:

- must be used under medical supervision
- not suitable as sole source of nutrition
- not to be used by individuals without Hyperleucinemia
- for toddlers and children over 1 year of age with Hyperleucinemia
- not suitable for parenteral use
